

MOHAMMAD RIHAN

Senior Oracle DBA & Cloud Infrastructure Architect

Kuwait City, Kuwait | +965 666 48775 | Mohammed_Rihan@hotmail.com | linkedin.com/in/mohammed-rihan-107385123

PROFESSIONAL SUMMARY

Senior Oracle Database Administrator and Cloud Architect with 10+ years of enterprise experience delivering high-availability, mission-critical database solutions for major banking and telecommunications organisations across Jordan and Kuwait. Deep hands-on expertise in Oracle RAC, Exadata (X5/X9M), Data Guard, and Oracle Cloud Infrastructure (OCI). Holds 13 Oracle certifications including OCI Architect Professional (2025) and OCP 19c. MBA-educated technologist with a proven track record of eliminating unplanned downtime, automating DBA operations, and aligning infrastructure decisions with measurable business outcomes.

CORE COMPETENCIES

High Availability & DR: Oracle RAC, Data Guard, Failover Services, RPO/RTO Management

Oracle Database: 19c/21c Admin, RMAN, Data Pump, ASM, Partitioning, AWR/ADDM

Exadata: X5/X9M, Smart Scan, IORM, Cell Offloading, Storage Index

Cloud — OCI: Architect Professional, Exadata Cloud, Autonomous DB, OCI IAM, Alloy

Cloud — AWS / Azure: RDS, EC2, S3, Azure SQL, Azure VMs, Billing Management

Performance Tuning: SQL Tuning Advisor, Execution Plans, Index Design, Partitioning

Security & Compliance: Oracle AVDF, Audit Vault, TDE, VPD, Database Firewall

Middleware: Oracle WebLogic, JBoss, Oracle Enterprise Manager (OEM 24ai)

Automation: Shell Scripting, Oracle Scheduler, Cron, Python (basic)

Banking & Payments: SWIFT (GPI, IPS, ACH), Safewatch, Core Banking Systems

AI / GenAI: OCI Gen AI, Oracle AI Foundations, Select AI

Leadership: SLA Management, Incident Response, Team Leadership, Reporting

PROFESSIONAL EXPERIENCE

Senior Oracle Database Administrator

March 2023 — Present

JMT AI Ghanim & Sons · e-Portal Holding · STC

Kuwait City, Kuwait

- Architected and deployed Oracle RAC clusters on Exadata X9M hardware with automated Data Guard failover, achieving sub-30-second failover and eliminating unplanned production downtime.
- Administered Exadata X5 and X9M environments — IORM policy tuning, Smart Scan optimisation, and storage cell management — ensuring full SLA compliance across all production workloads.
- Led deployment of Oracle Enterprise Manager 24ai (OEM), centralising monitoring and alerting for 20+ database instances across multiple environments.
- Implemented Oracle Audit Vault and Database Firewall (AVDF), establishing a centralised security audit trail and enabling real-time threat detection for regulatory compliance.
- Designed automated shell script framework for health checks, space management, backup verification, and quarterly patching — reducing manual DBA overhead by ~40%.
- Engineered failover services on RAC primary and DR sites, enabling zero-downtime planned maintenance and validated rapid disaster recovery switchover.
- Administered Oracle WebLogic application server environments: installation, patching, domain configuration, and deployment management.

Technologies: Oracle 19c, Exadata X5/X9M, RAC, Data Guard, ASM, RMAN, OEM 24ai, AVDF, WebLogic, OCI

IT Database & Application Administrator

July 2021 — March 2023

Bank of Jordan

Amman, Jordan

- Eliminated unplanned database downtime by engineering automated health-check monitoring scripts with cron-based scheduling, providing 24/7 oversight of Oracle and SQL Server instances.

- Managed Oracle Data Guard replication and Exadata Cloud services for the bank's core infrastructure, maintaining RPO/RTO targets aligned with Central Bank of Jordan regulatory requirements.
- Administered SWIFT messaging environments (GPI, IPS, ACH, Safewatch) ensuring 24/7 availability of international and domestic payment rails.
- Owned full Oracle WebLogic and JBoss application server lifecycle — installation, patching, deployment, and performance monitoring via OEM.
- Governed OCI cloud accounts including billing oversight, contract management, and capacity planning.
- Executed complex database migrations and Data Pump operations for core banking systems with zero data loss.
- Administered multi-cloud environments across AWS and Azure, supporting application teams with provisioning and troubleshooting.

Technologies: Oracle 19c, Data Guard, Exadata Cloud, SWIFT, WebLogic, JBoss, OCI, AWS, Azure, SQL Server

IT Senior Operations Supervisor

April 2018 — July 2021

Bank of Jordan

Amman, Jordan

- Supervised IT operations team, establishing standardised checklists and performance benchmarks delivering consistent, audit-ready outputs across all production systems.
- Served as primary technical escalation point for incidents, resolving issues within SLA thresholds and implementing root cause fixes.
- Oversaw critical daily banking operations including end-of-day processing, backup verification, and core transaction completion.

IT System Operator

October 2015 — April 2018

Bank of Jordan

Amman, Jordan

- Monitored bank-wide infrastructure including servers, network switches, ATMs, and data centre systems.
- Managed ATM network uptime using dedicated monitoring platforms within SLA requirements.
- Executed and verified daily system backups ensuring data integrity and recovery readiness.
